

BRUNO ALBÍN

SOFTWARE DEVELOPER – ADVANCED
COMPUTER ENGINEERING STUDENT

ABOUT ME

Computer Engineering student with experience in developing software solutions and participating in academic projects focused on solving realworld problems. I have the ability to adapt to different roles, technologies, and challenges according to project needs, applying engineering best practices and agile methodologies. I am seeking a new professional experience in IT, with the goal of quickly integrating into a work team, learning new technologies and processes, and contributing value from a technical and collaborative perspective.
